An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows in order to maintain claim language correctness. (Applicants current amended version of claim 18, filed April 23, 2007, does not include this correction as made in the amendment of October 26, 2006).

IN THE CLAIMS:

18 (Currently Amended) A funnel for a fuel ~~full~~ fill system, the funnel comprising: an inlet port configured to receive a nozzle from an external fuel source; an outlet port through which fuel from the nozzle passes to a fuel filler tube; and a fuel vapor port configured to direct fuel vapor entering the funnel towards the outlet port; wherein the fuel vapor port has a centerline disposed at a first angle less than 90° from a longitudinal axis of the funnel; and wherein the fuel vapor port is further configured to direct the fuel vapor entering the funnel at a second angle less than 90° from a line tangent to an inner surface of the funnel at a point where the fuel vapor enters the funnel, the angle being in a plane perpendicular to the longitudinal axis of the funnel to introduce a swirl component in the fuel vapor around the inner surface of the funnel, which creates a low pressure region in the funnel to reduce the amount of fuel vapor that escapes the fuel fill system.
